

MOSSEL BAY MUNICIPALITY

TEMPORARY WATER SUPPLY SYSTEM

Trenchless Technologies has been appointed by the Mossel Bay Municipality to upgrade the aged water infrastructure in Danova. Your water for the next few weeks will be supplied through a temporary water supply system which is controlled by Trenchless Technologies. This system will be in place until the aged water infrastructure is replaced. Trenchless Technologies requires access to your property to connect the water meter to the temporary line.

The municipality cannot guarantee continuous water supply. Provided that if the water supply to a consumer is interrupted for more than 24 hours, the municipality or its authorised agent will endeavour to provide an alternative basic water supply as soon as reasonably possible. The Municipality therefore encourages consumers to make alternative arrangements if uninterrupted supply is required.

If you are experiencing any water interruption, please contact Guillaume Masala at 069 717 4711 or alternatively Victor Mbadamana 076 270 0553 or Kurt Bruyns 064 044 1384. The situation will continue for the duration of the project.

MOSSELBAAI MUNISIPALITEIT

TYDELIKE WATER VOORSIENING STELSEL

Trenchless Technologies was aangestel deur die Mosselbaai Munisipaliteit om die verouderde water infrastruktuur te vervang. U water gaan vir die volgende paar weke voorsien word deur 'n tydelike voorsiening stelsel wat deur Trenchless Technologies beheer word. Hierdie stelsel sal in plek wees totdat die ou water stelsel vervang is. Trenchless Technologies benodig toegang tot u perseel om u water meter met die tydelike stelsel te verbind.

Die Munisipaliteit kan nie ononderbroke water voorsiening waarborg nie. Indien water voorsiening onderbreek word vir meer as 24 uur, sal die munisipaliteit of die gemagtigde agent strewer om 'n basiese water voorsiening te verskaf so goue as redelik moontlik.

Indien enige onderbrekings ervaar word kontak asseblief vir Guillaume Masala 069 717 4711 of alternatief Victor Mbadamana 076 270 0553 of Kurt Bruyns 064 044 1384. Die situasie sal voortduur vir die duur van die projek.
